Transmittal No. 03-29

CANADA – JAVELIN Anti-Tank Missile Systems

On 3 September 2003, the Defense Security Cooperation Agency notified Congress of a possible Foreign Military Sale to Canada of JAVELIN Anti-Tank Missile Systems as well as associated equipment and services. The total value, if all options are exercised, could be as high as \$132 million.

The Government of Canada has requested a possible sale of JAVELIN anti-tank missile systems consisting of 200 JAVELIN command launch units and 840 JAVELIN missile rounds, simulators, trainers, support equipment, spare and repair parts, publications and technical data, personnel training and equipment, U.S. Government and contractor engineering and logistics personnel services, a Quality Assurance Team, and other related elements of logistics support. The estimated cost is \$132 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Canada to fulfill its NATO obligations; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

Canada will use these JAVELIN anti-tank missile systems to enhance their direct fire capability for infantry, cavalry and commando units against armored vehicles, buildings and field fortifications. These systems will provide Canada with a strong, man-portable, direct fire capability and will increase interoperability with U.S. forces. Canada will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be JAVELIN Joint Venture (Raytheon and Lockheed Martin) of Orlando, Florida. One or more proposed offset agreements may be related to this proposed sale.

Implementation of this proposed sale will require the assignment of a U.S. Government Quality Assurance Team consisting of two U.S. Government and one contractor representatives to Canada for one week to assist in the delivery and deployment of the missiles.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law; it does not mean that the sale has been concluded.
